

PROVINCIAL DEPARTMENT OF EDUCATION NORTH WESTERN PROVINCE

THIRD TERM TEST - 2020

MATHEMATICS - I

02 Hours

Name / Index No. :

Grade 11

- Answer all the questions on this paper itself.
- Each question carries two marks in Part A and 10 marks for each question in Part B.

PART - A

- 01. The assessed annual value of a house, within the administrative domain of a certain provincial council, is **Rs. 48000**. If the annual rates charged on this house is, **Rs. 1080**, calculate the rates percentage.
- 02. The following Venn diagram denotes how the students of a certain class, passed an examination. Shade the region relevant to the girls who failed the exam.
- 03. Denote in the index form. $\log_3 243 = 5$

05. Factorize. $2x^2 - x - 3$

06. **600** litres of water, flows through a pipe within **10** minutes. Find the rate of water flow of that pipe in litres per second.

07. **AB** is a diameter of the circle with centre 'O'. $\overrightarrow{ABC} = 65^{\circ}$. Find the value of \overrightarrow{BDC} .

11. In the given figure, \hat{ABC} is bisected by **BD** and AD = EC. Name two triangles which are congruent and state the case of congruency.

12. Solve. $2x^2 - 32 = 0$

- In the building **AB**, the top most floor is **A** and the bottom is **B**. 13. When observed from A, a car parked at point C on the horizontal ground can be seen with an angle of depression of 42°. (i) Show the given data in the sketch.
 - (ii) Denote tan 42° using the sides.
- In the given figure, **ABCD** is a cyclic quadrilateral. **AD** is produced upto 14. **E**. Find the values of *a* and *b*.

- 15. Find the least common multiple. $4a^2$, 2ab, $3b^2$
- In the geometric progression with 2 as the first term and also the common ratio, denote the 15th term as a 16. power of 2.
- The radius of the circle with centre 'O' is 13 cm. AB is a chord and OX **AB**. 17. If OX = 5 cm, Find the length of AB chord.

AC is a tangent to the circle with centre 'O'. If $\overrightarrow{CBD} = 50^{\circ}$, find 19. E the values of x and y. D O v Ā C

n

B

C

A

B

- 20. There are **28** pencils of same shape and size, in a box. Some of them are red in colour and the rest is yellow. If the probability of a pencil randomly drawn out, being yellow, is $\frac{3}{7}$, find the number of red pencils in the box.
- 21. Find the arc length of the shaded region of the circle with radius **21 cm**.

- 22. Find the number of days needed for 8 men to complete, twice of a work done by 4 men in 7 days.
- 23. Consider the following statements and put (\checkmark) or (\varkappa) in the boxes provided.
 - $(i) \qquad \mbox{The diagonals of a parallelogram, are bisected perpendicularly}.$
 - $(ii) \quad If the opposite sides of a quadrilateral are equal and parallel, it is a parallelogram.$
 - (iii) The diagonals of a rhombus, bisect its area.
- 24. The locus of points equidistant from **AB** is **CD**. Sketch the point **M**, which lies on **CD** and which is equidistant from **A** and **C**, by using the knowledge about loci.
- 25. Draw the frequency polygon on the histogram given below.

B

- (01) (a) In a certain Pradeshiya Sabha, (Local Government office) $\frac{3}{7}$ of the funds received by it, is allocated for development purposes and the rest is distributed equally among three Grama Niladhari Divisions.
 - (i) What fraction of the total amount is given for a Grama Nilashari division ?
 - (ii) If a Grama Niladhari division gets Rs. 800 000, what was the amount allocated for the development purposes of the Pradeshiya Sabha ?
 - (b) The following distance time graph denotes the way that Mr. Rohana travelled in his motor bike to the city.
 - (i) Find the speed of the bike in the first 15 minutes, in kmh⁻¹.

(ii) If Mr. Rohana travelled with a speed, of 60kmh⁻¹ in the last 10 km, find the time taken for it and find the value of A, in the graph.

(02) In the given figure, ABCD is a square shaped metal sheet of area 196cm². Maximum number of sectors with radius 7 cm and 45° of angle at the centre, is going to be removed from it.

05

- (iii) In a sector that is going to be removed,
 - (a) find the arc length.
 - (b) find the area.
- (iv) Find the perimeter of the remaining metal sheet after removing one sector.
- (v) Estimate how many sectors can be removed from the ABCD metal sheet.
- (03) (a) In a certain Private Limited company which pays annual dividends of Rs. 6 per share, Mr. Priyanjana invested Rs. 50 000 and received a dividend income of Rs. 15 000.
 - (i) How many shares have been bought by Mr. Priyanjana in the above company ?
 - (ii) Find the selling price of a share in the company.
 - (iii) After receiving the dividend income, Mr. Priyanjana sold all the shares for Rs. 60 000.Write the percentage of the capital gain to the amount he invested in the company.
 - (b) The assessed value of a house in a certain administrative division is Rs. 80 000. The annual rate percentage charged on it is 6%.
 - (i) What is the amount of rates charged for one year ?
 - (ii) What is the amount of rates charged for a quarter ?

(04) (a) The amount paid for school vans by students in a certain month is given in the table given below.

Amount paid (Rs.)	No. of students	Cumulative frequency
0 - 1000	4	
1000 - 2000	3	
2000 - 3000	5	
3000 - 4000	7	
4000 - 5000	3	
5000 - 6000	2	

- (i) Complete the cumulative frequency column in the above table.
- (ii) By taking a suitable scale, draw the cumulative frequency curve.
- (iii) Find the median amount paid by a student, by using the cumulative frequency curve.

- (b) The methods of coming to school by a certain set of students is given in the pie chart.
 - (i) If the number of students, who come to school by school vans, is 24, find the no. of students who walk to school.
 - (ii) What fraction of students come to school by buses ?

- (05) (a) 3 white hair pins and 1 red hair pin of same shape and size, are in a box. Namali takes one hair pin out, randomly and gives it to her sister. Namali then takes another hair pin for herself.
 - (i) Represent all the possible outcomes in the given grid.

- (ii) Mark all the events of taking two hair pins with different colours and write the probability of it.
- (iii) If Namali replaced the hair pin of the first draw and then took another hair pin, show that the probability of the above question is 37.5%.
- (b) There are 2 red pens and a blue pen in box A and 3 red pens and 2 blue pens in box B. The pens are of the same shape and size. A student tosses an unbiased dice with the faces marked from 1 to 6. If the dice gives number 4 or a number less than 4, a pen from box A is taken out. If the dice gives a number greater than 4, a pen from box B is taken out.
 - (i) Complete the blanks in the given tree diagram.

- (ii) Extend the given tree diagram according to the events of taking out a pen from box A and box B.
- (iii) Write the probability of getting a red pen.

PROVINCIAL DEPARTMENT OF EDUCATION NORTH WESTERN PROVINCE

THIRD TERM TEST - 2020 MATHEMATICS - II

Grade 11

03 Hours

Name / Index No. :

- Answer 10 questions by selecting 5 questions from part A and 5 questions from part B.
- Write relevant steps and correct units in the answers.
- Each question carries 10 marks.
- The volume of a right cylinder with base radius r and height h, is r²h.

Part - A

(01) An incomplete table to draw the graph of the function y = x(x - 4) - 1 is given below.

x	-1	0	1	2	3	4	5
У	4	-1	-4	•••••	-4	-1	4

- (a) (i) Find the value of y when x = 2.
 - (ii) Draw the graph of the above function by taking a suitable scale.
- (b) From the graph,
 - (i) Write the coordinates of the turning point.
 - (ii) Write the interval of values of x when the function is negative.
- (c) (i) Find the roots of the equation $x^2 4x 1 = 0$ using the graph.
 - (ii) Write the equation of the function when the above graph is displaced up by one unit, in the form $y = (x a)^2 + b$
- (02) A survey was conducted by using 50 employees who assemble electric equipments in a certain company. The time taken to assemble one electric equipment and the relevant no. of employees is given in the table below.

Time taken to assemble one equipment (minutes)	20 - 24	25 - 29	30 - 34	35 - 39	40 - 44	45 - 49
No. of employees	4	7	18	12	06	03

- (i) Write the modal class.
- (ii) Find the mean time to assemble one electric equipment to the nearest whole number and show that the number of employees needed to assemble 1440 equipments in an eight hour shift, is more than 100.

(03) The following table shows how two shops sell the same electric equipment for the customers.

Shop	Market Price (Rs.)	Down Payment (Rs.)	No. of Monthly Installments	Loan amount to be paid monthly (Rs.)
А	35 000	7 000	10	
В	34 500	6 500		2 800

- (i) Copy the given table in your answer sheet and complete the blanks.
- (ii) Find the number of month units that the interest has to be paid by a person who bought the equipment from shop A.
- (iii) If the interest for a month unit in shop A is Rs. 35, find the monthly installment in shop A.
- (iv) If shop B charges, Rs. 42 of interest for one month unit, find the annual interest percentage of shop B.
- (04) Figure A shows a square shaped metal sheet with length x cm.
 Figure B shows a rectangular metal sheet which is obtained by removing 2 cm from one side of the square sheet and adding 4 cm to the other side of the square sheet.

- (i) Write the length and breadth of the rectangular metal sheet.
- (ii) If the area of the rectangular sheet is 41 cm^2 , construct a quadratic equation using x in the form of $ax^2 + bx + c = 0$
- (iii) By completing the square or using any other method, show that the length of a side of the square is $5\sqrt{2} 1$
- (iv) By taking $\sqrt{2} = 1.41$, find the length of the rectangle.

(05) (a) Simplify. $\frac{1}{4x+4} - \frac{1}{5x+5}$

- (b) Sujatha buys kids shirts for Rs. 180 each and kids trousers for Rs. 150 each by spending Rs. 2940. She then sells kids shirts for Rs. 280 each and kids trousers for Rs. 300 each and gains a profit of Rs. 2300.
 - (i) By taking the number of kids shirts she bought as 'a' and number of kids trousers as 'b', construct a pair of simultaneous equations.
 - (ii) By solving them, find the number of kids shirts and kids trousers that Sujatha bought.

- (06) A ship which leaves harbour A, sails for 50 km with a bearing of 035° and reaches harbour B. Then it sails from harbour B to harbour C with a bearing of 180°.
 - (i) Show the data in the given sketch diagram.
 - (ii) The perpendicular distance from A to BC, is AD. Find the distance AD by using trigonometric ratios.
 - (iii) If DC = 20 km, Find the value of ACD.
 - (iv) By using ACD, find the bearing of harbour A, from harbour C.

plants are grown in square shaped rings.

(07) (a)

(i) When the number of plants in the first, second and third rings are considered, in which type of a progression can they be written as consecutive terms ?

- (ii) In which ring is 48 chillie plants are grown?
- (iii) What is the total number of chillie plants in 12 rings ?
- (b) In the geometric progression 3, -6, 12, which term is 192 ?
- (08) (a) The figure shows a cuboidal metal block with cross sectional area as 8 cm x 8 cm and length 18 cm. This metal block is melted and without wasting any metal , 9 metalic cylinders are made with radius 'a' and height 7 cm. Show that $a = \frac{8}{11}$
 - (b) By using logarithm tables, find the value of a' to the nearest second decimal place.

- (09) Construct the followings by using only a straight edge with cm/mm scale and a pair of compasses. Show your construction lines clearly.
 - (i) Construct the ABC triangle with AB = 7 cm, $ABC = 60^{\circ}$ and BC = 5.5 cm.
 - (ii) Extend AB upto E, and construct the locus of points equidistant from BE and BC.
 - (iii) Mark the point of intersection of the above locus and the bisector of BAC as O and construct the perpendicular OD, from O to BE.
 - (iv) Construct the circle which touches BE at D and also the BC side.
 - (v) Write the reason for the extended AC to become a tangent to the circle with centre 'O'.

- (10) In the ABC triangle, AB = AC and the midpoint of AB is D. AC is produced upto E so that AD = CE. And also CE //DF and when EF is produced, it meets AB at S.
 - (i) Show that CEFD is a parallelogram.
 - (ii) Prove that 4BS = AB.
- (11) The following Venn diagram shows the details about customers who came to a super market within an hour and the things they bought such as fish, rice and cereal.
 - (i) Copy the given incomplete Venn People whodiagram in your answer sheet and bought cereal include the data given below.
 - No. of people who bought rice, is 20 and the no. of people who bought only cereals, is 4.
 - 6 people bought only rice and out of the 12 people who bought rice and fish, 4 people didn't buy cereals.
 - 16 people bought fish and one person bought fish only.
 - (ii) How many people who came to the super market, bought cereal ?
 - (iii) If Mr. Sumith bought rice and fish only, shade the region which denotes it.
 - (iv) What is the total number of customers who came within the hour ?
 - (v) If all the people who bought fish, also bought rice, name A and B in the new Venn diagram.

(12)

B

- AC and DB intersect at F.(a) (i) Copy this figure in your answer sheet and include the given data.
 - (ii) If CBE = a, express the given angles by a, and give reasons too.
 - (a) BDC (b) BCF
- (b) (i) Prove that ADF triangle and BCF triangle are equiangular triangles.
 - (ii) If 5 BC = 4 AD and DF = 4 cm, find the length of CF.
